Benefits for stakeholders

Production

- **Optimized total cost of ownership**
- **Lower energy costs**
- **Faster assembly times**
- **Reliability and quality**
- **Optimized ratio** between procurement and operating costs

Sales

- **High availability** and punctual delivery
- **Streamlined processes** and simplified decision-making
- Expand your **portfolio** with a **product that delivers added value**

Planning

- **Personalized support**
- **Provision** of all the necessary data
- **CAD drawings/BIM data**
- **Special products possible**

Our expert team

"Here in team 'beck', we are constantly optimizing our products and we always find an innovative solution to meet our customers' requirements."

"'beck' is THE plastic molding supplier for the technical building services sector. THE Number 1 when it comes to the best quality at fair prices!"

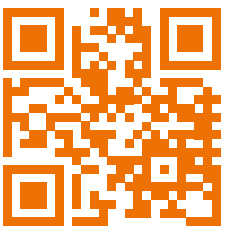

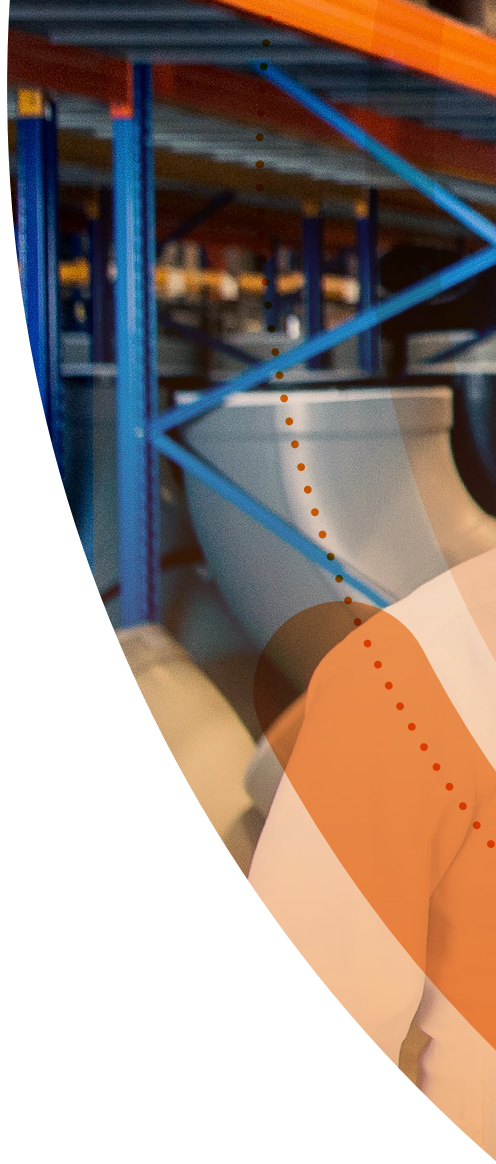

"Our goal – to create efficiency and flexibility with our products, saving money and energy."

"Individual customer support and innovative product solutions – such as our EffiTech plug-in system – set us apart. It's very important to us that we harness all our experience to ensure consistent quality."

"Making things happen, and fast: action, not just words, makes the difference in our everyday work."
